Stingray Racer 6 Lane Slide Racer - NEW in 2010

Fact Sheet

Description

This all-new, high-speed competition slide towers more than five stories in the air. Six lanes allow riders to race against each other in a head-first dive for the bottom. Starting off with a ride through the curvy, enclosed section of track, riders aren't sure what to expect before popping out into the open race lanes and a side-by-side sprint to the finish. The high adrenaline ride ends with a gentle stop in the non-skid run out where fans may be waiting to see who grabs the fastest time.
